here, i'll help you earn your first place atop the 19.000 search results for 'homeopathy "corona virus"'.
Please explain why figurehead skeptics get away with deriding homeopathy after they demonstrably neglect the difference between stirring and shaking. Yeah, that happened, though it might be outside your satirical purview.

i would add to that a tale about Fort Detrich being the inception and deployment point *(infected soldiers)* .. which paused the one and only great WW for a generation from the fall out .. they landed in spain rather than italy ... and that wasn't the most gruelling biowarfare thereabouts *(Maryland)* by any means. Here is exactly what "flatten the curve" looks like and what the alternative is.

though the homeopathic factor is by definition astronomically small ... it is also ..... ubiquitous ... ground rule so to speak so do not discount it or rule it out as you do .... loads of carriers coofin into weather systems that keep the virus alive and dump it thousands of miles away along a curve quickly reaches ... hundreds of thousands after a few rinses / repeats .... ergo ... it's been aroun n aroun a round world multiple times now ... and many have had a dose in perfect potency to pioneer the way to herd immunity ... i fancy i am one such cause i had an unsually sharp sore throat very briefly weeks ago. it's mother nature's vaccination program, old as the hills .. and causes our spacious dna library to provide pleasant ambiance and never sound hollow.

i go: iCs filled to capacity means less prolongation and actually worsening of suffering in most cases no? i mean most cases for whom Corona is the proverbial buckettipping drop. you say 70% in the end but for most of those Corona is not at all a critical factor

The gains - for the borderline terminal in any case, pushed over the edge by Corona - from IC treatment is total peanuts ....

.... compared to the non terminal / non lethal forms of life quality degradations, ratcheting up on all fronts ... not to mention that putting all on hold *[to put it too kindly]* in order to cycle as many as possible thru ics does, to me at least,

smack of cultic bottleneck traffic to the sacrifical altar. Carriers, transmitter, 'nonsymptomatics', vectors, etcetera, increase exponentially no matter what .... you could quarantine the elderly preemptively at best ... go on then boomer poppies and mommies, demand the ultimate sacrifice ... or renounce it ...if only bycause you balk at a humiliating treatment that gives you only half of what little carefree life you had left back.
.. half of the patient make it thru IC alive he says in the end

he should have put bioweapons in the title really ... here's what i posted:
some*[wan]*'one' pranked the ccp and told them 'hey i'll show the way' to awe and respect .. we'll help you pretend you can handle an epidemic. Remember china had bioweapon experts AND pandemic simulators over for a prepping excercize ... and we know how often these are upgraded to live and sharp oopsies.
The stampeding specialists i am talking about knew full well a flue is uncontainable and goes round the world in no time, using planes boats and the weather itself, the latter doin a heads up homeopathy prep that natural way.
Anyway, they fudge the numbers and manage to turn the whole thing into a nepture entering pisces celebration leveraging the make believe into a worship of costly terminal care which succeeded beyond their wildest dreams with an 'at all cost clause, ... draconianisms stacked to ever more perilously sharp heights of alpha position clambrin after ever more staggering proof of decept, belief & compliance.

vast majority of testers count the antibody carriers among proof of infection but that's like saying the cure is worse than the disease. On the contrary, i think that contact with healed 'containers' is prolly beneficial *(pass me that password bro, i wanna be counted amongst you)*. they are the couriers of normalcy and mingling in the park / orchard / neighbourhood care and growing area would prolly be enough to spread their 'molecular robustness'.
What complicates matters is bad habits triggering brief flare ups .. oopsies if you will, an infectious window of time before your immune response ramps up and saves the day once more.
But what really complicates thinks is the stuff our metadata sleuth George Webb churns up. how's my poetry lover today ? .. bring thy corona patients to me, .. your deadly sick and death's door dwellers .. so i can breathe a blessing thru the air for their belaboured inbreaths, .. mayking my corona history theirs also. -- i had a violently sore throat for mere hours over a month ago before the perfect defense kicked in ... prolly something to do with my early 80s AIDS contact .. it did cost me incredible decades long struggles as all those aminos fought for a share of the pie ... but i calmed their asses eventually ... with vitamin c more than anything.
irony is, that the work i parked at archive.org last fall, the first installment of notes that span 20 years of keyboard wridership, has the potential to reach many many more .. with infintely more, but more delayed, benefit, once what i say is acknowledged and widely corroborated. Kaufman that's promoting this idea of exosome theory instead of viruses .. now there are exosomes and that's how we excrete out certain chemicals out of the cell for in you know intercellular communication all right but he is saying you know that the viruses don't exist that they're actually the exosome and it's like that's total garbage and in in how do you how do you how do you account for the sequencing of the gene the genome and I that how do you do like CC how do you there's something called cDNA where you make a library of complementary DNA from from so what you can do is you can take RNA out of out of a cell all right so like messenger RNA if there are what is being transcribed so in in organisms like us we have introns in it and extra exons so in intro in so these these spaces within the genome are coded and non-coated but they can they can be spliced in certain ways where you can have a whole plethora of different different proteins that are created

... at 10:33 he switches to the effect of smallpox on injuns as proof stray waste is not good for you ... specially if handled with evil intent .... duuuuuh ... if you have a visceral response to Kaufman you will never get to the holy of holies defiled in the late 19th century when the parmaffiya had it's first great court victory over Julius Hensel

> Hi Piet Thank you four your stimulating comments. I gather you have certain reservations about paradise-engineering. Honestly, though, I think you'd find a world where everyone was blissfully happy isn't nearly as bad as it sounds. I could of course be wrong! Anyhow..... very best wishes for a Happy Christmas! My answer: I guess I owe you a completion of phrases: I can't believe you haven't included the natty link in your list since you are in Brighton too. I went to their gathering last summer. Leaving aside the positive aspects it was nothing but same old usual hedonist shit heaps stinkin to high heaven with everybody sleeping a hole into the, thereafter too hot to work, day; just like I am used to at the rainbow gathering. If I should find out you haven't I will become even more ex seethingly mad cause I am a *(murderous?)* butcher's son who knows where you're coming from *(been all the way up to fruitarian for a while but retraced my steps somewhat)*. And cause I call "vergoeilijking', 'verharmlosung' and such tacitly uncritical approval of hard drugs, even if or when and actually, especially when saved for the last moment in life, and suggesting it is similar to sex *(on drugs implied?)*, quite unpalatable and proof of another rave culture victim; a gem of a mind worped by boring bottom base lines, it's a miracle you have such a love for nature left. I mean, how the cluck do you harmonize your infatuation with chemistry which is so far from that of a certain somebody, lurking in my files, by the name of Julius Hensel who certainly shares your interests nominally but manages to not go into and on the artificial, manipulatory cheating stage with it, unlike Dupont I would say....

> "When heaven has been biologically implemented, then the very notion of tampering with our new-won "natural" condition and feeling "drugged" will come to seem perversely immoral. For who would want to contaminate the purity of their ecstatic biological soul-stuff with alien chemical pollutants? Until that era arrives, however, we still need chemical mood-enrichers"

If you like to condone, sanction, continue and cover for bad habits, then the dystopian side of the equation is the result of that self amputation, technologization and self banishment. In that situation it makes sense to do a large pandemic excercise ... and who to better and more convincingly lead that than the biggest medimaffioso of the last decaades than Anthonly Fauci ... cheers.

> I'm not trying to be argumentative but these are questions people have asked when Ive said a virus is not contagious and I dont have an answer for them.

poison --------- infection -------- nasty suprise
cure ---------- antibody---------- timely warning
'sathanatopians' have turned the breach of infection and the antibody of immunity around - the pharmaffiose 140 year long and slow but victorious and presently cllimactic march thru the institutions have stuck to tried and 'true' *[but alas, evil]* needleage .. inverting and reversing cause and effect. Profiting by 'cures' and 'preventions' *(which are nothing of the sort and worse than short cuts or emergency measures, nothing like proper living at all but rather quick fixes that sanction, condone and promise ability to perpetuate bad habits with impunity)*.
The infection thing is real but it applies and takes hold of those below certain thresholds, incredibly sharp and often invisible, more and more 'merely' vibratory frontlines of tec and memetec where timely warnings *(ignored, such as my 13000 pages of notes and hints since 1996)* stop without starting much at all in the first place and nasty suprises begin with the speed and range of weather systems
nice long comment:

> DaBluntTruth - 9 hours ago: Germ THEORY has been debunked since 1918 ... ... this is all an obvious PLANdemic by Bill Gates and his friends.

today i rebutted aplanetruth 4u: yeah good info .. except that viri do exist and can cause epidemics in any and every region compromised in some way or other, then travel on weather systems to the next, but the dilution and homeopathicization of that transport gives surrounding regions a chance to leaf thru their micro / cellular libraries and build a lock to capture and pacify the key gone so haywire it's become a drill with a mad spin. This info passes at the speed of gossip, which is notorious for its height no? Thus very few epidemics turn into pandemics and a predatory pounce becomes a news item and matter of record.

8th in thread:
aerosolization and contact infections are real but apply in compromised regions only. the number of 'immuno compromissory' *['compromissive'?]* items increase and stack up cumulatively until a breach is found ... a bit like screwing our weather up to the point we lose water to space ... i think Victor Schauberger explained that sometime in the 40s maybe. yes electosmog is real, no, the 'spanish' flue is not a radio result, prolly not even a vaccine one. fr Detrick organized a trainride for chicken and soldiers *(in that order, across mountains in unheated railcars)* until they got sick and could select a number to cook for bigger numbers then shipped to already heavily compromised regions *(where it don't take much coofin n contactin at all to start a very wild fire)*

normal flue season = 100% .. covid, speeds it up so it's quicker and over with faster ... this shortens the seasons and conjures the spectre of overbooking and care traffic jams *(flipped into the opposite by the very hysteria you employ switching to warcasualties instead of normal mortality numbers)*. i don't think it was me expressing snoopery suspicions that got the warstick up your butt but just in case ... it was a misfortunate coincidence with connectivity and/or browser troubles ... the firefox elements in question allow 5 priority settings and after clicking to lowest i seem to be past that prob at least. the question is fully justified and to be expected from anyone who takes the trouble *(not much at that)* to look at some history. A free 1991 book pops up before long and that is capped by a fresh one with the author all over alt talkshows .. so .. the cancerous boil on Quoras ass is the fact none of this info comes up and yall do nothing but banter each other into lullisleep.

new twist in the transfecting tale. Singapore comes into the picture. Obama enabled dpt work to be patentable to lure 'brilliant' *[read 'greedy']* minds to the works of war? and now we have 'Leiden' *(= lead)* franchise of 'Johnson & Johnson' doing the grunt work for these worldpower grubbin thanatopians. the TinTin comics had a spy vs spy version named 'Jansen & Jansen' btw

the reason for the mystification has to do with the inversion principle implied / at work in all evildoings. ... it's very simply a perversion of the thumbrule when doing good: applying crushed rock to hygiene .... from immediate washing to delayed remote periodic application of say ... writing the line 'well fed forest' with 5 tons of the stuff over a kilometer or so .. with the sweet spot being a pre- and upcycle thru compost ... or 'compoost' as Collette O'Neill so eloquently puts it *[not that she's ever on about rock dust as i have been for 33 years now]*.
You simply do not know e.x.a.c.t.l.y what the chemical composition / proportions of the trace minerals are ... but you can trust the life in the soil you present it to. Let them be the judge and pickers and choosers, no need to get anal about it and play favorites. Do the whole deal.

> Two months later, the entire Science paper was retracted. Mikovits refused to sign the retraction notice, but she took part in another major replication effort. That $2.3 million study, led by Ian Lipkin of Columbia University and funded by the National Institutes of Health, was â€œthe definitive answer,â€? Mikovits said at a September 2012 press conference where the results were announced. The rigorous study looked for XMRV in blinded blood samples from nearly 300 people, half of whom had the disease, and none had the virus. â€œThere is no evidence that XMRV is a human pathogen,â€? Mikovits conceded.

the 1018 Natural News vid mirrored at TruthSeekerTV from a year ago has this comment by Robyn Erland:

> There is a lot of misinformation being spread online regarding this. I know because I was there since 2009 helping her and the suffering CFS patients through it all. I also have all the proof of everything that happened. I also tested positive for the mouse retrovirus in her family study and my whole family is sick, have cancer or are dead.
> ..... snip .....
> It's all in the book and everything that happened is still online everywhere. She also did not find the retroviruses in vaccines. She found them in CFS patients and the blood supply. This prompted officials to look into cell lines used to make biologicals. They found many mlv's in those cell lines. Here's one of their findings: Frequent Detection of Infectious Xenotropic Murine Leukemia Virus *(XMLV)* in Human Cultures Established from Mouse Xenografts https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3218386/
> ..... snip ..... on bird viruses:
> The infectious retroviruses are in their genomes and have been for decades. You can read about that here: https://www.the-scientist.com/daily-news/unexpected-origin-of-an-avian-virus-38813
>
> One other problem I found a few years ago was the fact Asia has been using mousebrains which are filled with retrvoiruses in their JE vaccines since the 30's. Interestingly they stopped using that version of the vaccines in

2010 shortly after Judy's paper came out and they sighted safety reasons. Here is the vaccine they had used to vaccinate all of Asia and elsewhere.
https://www.fda.gov/downloads/BiologicsBloodVaccines/Vaccines/ApprovedProducts/UCM123761.pdf

The problem is not just vaccines. If the birds can spread it via close contact and through vertical transmission, it's a sure bet that has been happening for decades in people. Many of us are already infected, so are our children and grandchildren. All it takes once the immune system is compromised is a viral or other infection or a vaccine to start the disease process.

Judy Mikovits keeping her top gear up for nearly 3 hours .... it's downrite astounding .... *['specially at 1.75 speed, my standard at Paul vids]*
JM talks about a 35 year span *[of corruption]* but if she wasn't so lost in detail myopic and obsessed with being the good wizards herding evil wizards ... she'd say 35 centuries .. or millenia even .. still not much in the scope and zoom out such people as Oscar Kiss Maerth present *(approaching tibetan / mongolian / mayan timespans with tales of cannibalism ... oh my)*.

10th of may was electric wind, k42, the day i find out JM is a Rhythmic Skywalker *[reed / corn ear / bee]*, k253, the last one in the wave spell of a tzolkin, which is a schematic that needs and benefits from dynamic viewing, prolly much like 'dem vaunted, vaulted and revaulting to being crowded too frictionheat raising closely' 'live' viruses and live dance scenes might be more instructive than pixelated ones. In this case a recent thought reaches heights *[no pun intended]* hitherto escaping focus although the simple slingshot gravity game - only one i ever enjoyed *[thanks jorn barger]* and it so fully satisfied i never longed for any others or even for more ...

a skywalker is preceded by the 14th seal, wizard
when times are bad, entartung etc, are rife ... red guard antifa types rampant ... a plague of wizards and wizzies is never too far off, wishing and wooshing along ... the very stuff prophets warn us about and then get blamed for instead of being asked about alternatives bycause of.

a wiz failng to pay attention to 'rock gizzards', lazy lizards and all sorts of rubby rubble dub, scrapey scapey apery .. causes plagues sooner or later ... .. and all that data crammin'# ... without ever doing much with them ... *[# = the dutch call studying 'blokken' ... was a bloke once streetlingo for the studied ones, idyids like me who cycle across the apalachians with 5kg of duh fave found treasure, curated for purposes of memorabiliaca and display .. which never panned out neither, 40 years later]*.

don't ask a dreadie but a tangle lost it's tingle *[i am partial to petting with silky hair .... goldmine if there ever was a cornpatigory able to compare)*.

if there is already a designation for a multiple of wizzies i don't know what it is but i suggest it be redesignated to CROWD of wizzies ... to indicate lack of o so necessary barrier between humans known as trees playing perpetual guest of honour. no chance for them in her breathless, part excuse for being lost among the stars and part expose on how to get out.

if the tzolkin was a relay and a wiz must take most of his cues from the walker, then this is not a case that leads to the red thread thru my work very easily, though it points in the right direction for sure.
in fact wizzies of the good kind come fast and thick these days, only yesterday i stumble over Klinghardt via Andreas Tuebner, a small mirror channel that's been very valuable. His chat about Bill Gates on Swiss tv is revealing = undoubtedly a heavier calibur wiz in the negative sense referred to, than Fauci.

this is all true within a bioregion with shared microflora ... but it discounts, ignores and neglects to zoom out to invasive and border crossing leaps, as in smallpox on turtle isle. And in fact, just within a bioregion there is a horizontal border of sorts, the vitality levels, those below a certain threshold will be susceptible to infection.

global travel increases pandemic risks hence it stands to reason if the biggest health institutions play thru scenarios ... even if the border between warning prophet and wishful profit chasin programmer becomes razorsharp and too wildly unstable to follow with the naked eye.
In fact, my personal philosophy is in line with keeping virus libraries and virus cocktail stocks topped up, welcoming them, excercizing them ... like a dog eating rotten food, which i did again last nite after i began hearing popping sounds and soon discovered a small glass i had filled with left overs a handful of days ago was under gaseous and oozy pressures. I ate it after recooking even though it didn't exactly smell great and i did not feel great afterwards either.
So ... who am i to fault Fauci .. were it not for the likes of Mikovits who makes it clear that the borderline between virus and vaccine is erased, crossed and flipped with nefarious purposes *(although if you ask them they have some sort of Gatesian 'clean up' and resource pressure relief memery packaging handy)*.
Taking out the immuno compromised is the way to a trimmer and fitter humanity?

the cutoffing edge of medical tests are in reality relirites
cucking to them is handing your life to the zogstrous powergrabbers
capturing eyeballs was yesterday, snapture of bloodveins and, oh horror, bloodLINES is now.

every wave of innotec notches up the envirotox and increasingly invisible freqwrecking factors and pressures pushing the weakest among us over the edge.
Now, suppose the unethikillinmakers invented and/or adapted or christspurned .. i mean crispered *[?]* one or a few from the plethora of available viri to go along with and be triggered by a new fave innowave. Why? To give themselves the purification agent illusion and delusion .. or god knows why, who should be suprised and wonder?

More likely is a common as shit virus gets triggered by G5 inadvertently, advertizing and betraying it's presence, what are it's pushers to do in order to break that causation chain?

We know they don't even hesitate at killing trees en masse no less ...

Don't you think one possible double / back of their potemkinate conjury and injury *(which we are slated to celebrate no less than 1000genders they boom to bloom)* might be a sideline of some equal strength virulence or other? One that dispenses with a telltale trigger like their product, a connexion they must distract from at all cost.

This is where George Webb comes in. He talked about manual and or drone spray release crews near the end of last week *[on a solo vid at wistia, as mystic and nourishing mists drift by him visibly]*, deployed for revolutions hither and thither, loads more nimble than the cumbersome old school hardware goin thru bulgaria, albania turkey lybia syria ... iow, far and wide afield, in markets to be targeted waaaaaay down the line after initial crude clearing .... who can wonder if that scenario is essential to market strategy success??

Viri been tortured, twisted and screwed with since WWII and surrounded / encapsulated with heavy trigger crisis protocols *[new george webb at Paul Cottrell's channel is informative on that point]*.

the test is a reli rite, a pretense you are special
hiv and corona are as common as coli

Here's a thought or 2 about travel, one of the main pushpoints for "major aggressions" as Andy says around the half h mark.

You plan a center, monastic sanatorium library, meds growin outfit that recycles patients and searchers into fit cloneseed of itself. That costs money .. i'd like to try top whatever offers you get in the way of buying land to try lure and tip your favor to eurasia, not that i think it's "probable" i'll succeed with you lot any easier than with ordinary whities on red land. which will be the cause of loads more suffering unless remedied / reversed, i've been arguing this since 1997 but failed to establish the attractive inviting and invasion reversing community *['cult of transparancy' a good name?]*.

The separation tho, is to protect you, necessary and made extra so - due to your stance / present understanding of viruses *[perfect health unassailable by and antithetical to it. Not my take, i alllow for a lot of caution where necessary, the bioweapon thing has gone vi[r]a[bl]e on multiple fronts]*. that's why i have this playlist:
https://www.youtube.com/playlist?list=PLIpPGMdQttCIdo9Ig6CEj_yVrZarbi22_
QUEEN of maffiyas leads worldpowergrab

i am pretty sure you only seem to but might as well pay attention to my playlists .. or at least find similar and sorta parallel breadcrumbs .. may they all converge and finally ... finally ripen the 60s rock rolling grip *[pie]*- rather than fistmaking into coming of age

the 51st m i expected andy to add: "crisis of the right mix, crisis of tracing a moving faultline" to his terrain vs germ crisis & schemery .. but he said "proportion, that allows the shift to be made"

I'd like to think you're not an either or / winner loser machinist Andy, it's polar opposite unstable extremes model between which as per boringly bloody usual the BIOFOCAL MUST INDENTIFY AND DISENTANGLE FROM BIOCIDAL which displaced it and turned life into dead deadly, deadlier and ever deadlier still, finally not nomans- as in all beings lands but into nogo for nothing zones, .. or else supersharpened borders, tenser and tenser ...

4m before the end, Amandha talks about the 'frenetic virus fear', denying the existence of bioweapons one last time, emphasizing she needs help 'setting herself apart' with as many like minds as possible .. where's the 'too good for this world' farm when you need to rescue some glib and stubborn naives?

> Amandha Vollmer goes Farther Down the Rabbit Hole with Paula Gloria Barton on Woodstock Radio 104 WI --- 2.4K views - Jul 28 - YumNaturals Emporium - 21K subscribers

biophilial vs biocidal is indeed parallel to how bipeds get and/or try get a bead on carbon ... it's like tide levels ... influence on carbon: 1= sun, 2=volcanism, 3=minerals, 4= climateviewer.com = jim lee's equivalent to your weatherwars101.com ... i am guessing they are similar .... Amandha, you sound like your most unsympathetically zealotous in this one btw.

> YumNaturals Emporium - 25 minutes ago: No bioweapons other than poisons. That's just fear mongering and flexing, same as nuclear weapons. Games.

i've lost faith in her today .. which i should have done a week ago when she did not even bother answering when i asked her why my sister caught a disease from me induced by an overdose of homeophatic remedy *[pyro.. something .. pyrogen? made of rotting flesh to ripen boils]*. we must have shared cups or spoons inadvertently *(not our habit)*. it aint black vs white, there a dynamic grey tide between them. She however claims there are no bioweapons, only poisons *(i expect her to petition ft Dietrich and its hundreds of spawn for a name change any day now)*.

GW mentioned:

> On 13 March, the US government summoned Chinese Ambassador Cui Tiankai to Washington over the coronavirus conspiracy theory.*[148]* Over the next month, conspiracy theorists narrowed their focus to one US Army Reservist, a woman who participated in the games in Wuhan as a cyclist, claiming she is "patient zero". According to a CNN report, these theories have been spread by George Webb, who has nearly 100,000 followers on YouTube, and have been amplified by a report by CPC-owned newspaper Global Times.*[149][150]*

I am surprised to learn that Joe Biden owns an island, called Water Island, across from the late Jeffrey Epstein's Island. There is an old submarine base there, and Ghislaine Maxwell is connected with a submarine company in the same area.
One of the greatest investigative journalists of all time, George Webb, just reported on these shocking facts.

not long ago i completely agreed with Amandha, Andy, etc. After all, it was a logical extension of my fave satanic anecdote by Doug Dietrich, one of the few pieces i thought it worth rescuing from the wreckage that is his narration sauce, bound to make you ill wether intended to do so or not. But i am ready to disavow just about all he says now. In the midteens he repeatedly claimed the flu was carefully cultured by intentionally choreografixing deprivation caused and catalyzed immunity breakdowns in otherwise very strong people *[icy trainrides for soldier stuffed cars behind chickenpacked ones]* selecting a resistant carryer / transmitter and giving him a prominent place from which to infect others *[the barracks cook legend, my first 'contact' with Ft Detrick btw, from which troops went on to land in Spain]* ... which i meanwhile believe is impossible cause even a nonsusceptible subject conveys problem/solution // virus/cure in one inseparable package .. this is the molecular grapevine way way older than the printing press.
Those who are so completely in love with whole world phantasies are too good for a cold hard world and will squirm and spin until completely smothering all awareness of infectiousness. Not the hill i'm gonna die on.

In march i begin to focus on the possible bioweapon aspects [via George Webb's web of intrigue, spiking at his tiff w CNN and subsequent youtube channel loss, after which he guests on the channels of his fans].
Later [not until october] i zoom in on the infowar by crisis actor factor ... and in between there's lot about terrain vs germ theory.

As usual ... i find fault as often as i point to 'core action correctivism' where solution meets prevention and all cleanses as if by the kind of magic very few children get to carry into adulthood intact.

my tappage in dutch in these matters amounts to not even a 10th, but very significant and relevant *(... from the 9th of march onwards)*

Easy to diagnose from 10s of thousands of miles away, btw, unlike actual viruses, ... yet that's exactly what virologist Drosten pretends he managed, but he promotes nothing better than a catch all ... 99% of positives are proof of contact with innocent flues ... yet powers that be insist we invest in paranoia about all flues [PCR=Covid, i guess PCR is a weird standin for duh 'mighty wishful equalizer']. What are they thinking? Something like this maybe: why not fight them all at once and not just the one that scared the world via chinese crisis actors ... paid for by some very very dark cabals. We'll just pretend we can fight a virus, hyped into the cause of mayhem which duh 'fightercize' actually causes per virulence via a monopoly coalition meeting the maffiyas already pulling ropes & strings, having a say while taking that of critics away, holding sway and herding us, halfway

Pierre Capel told us last week that there are thousands of strains already .. and vaccines, as a rule belong in antiquary shops and museums from get go ... it's a desperation larp that can only be laughed off stage by the well informed. Suppose you're in the wild and have a dangerously upset stomach .. you're under micro assault ... you need to recruit some micro good guys .. and rule of thumb: an average handful of dirt has a billion armies with cooperative ones predominating at all times. Vaxing is an absurd version, a scattershot heard across the immunity mike check bow to see who's ready to forever hold their peace. Squirtable Biblical dystoprepschool stuff. Your 'sprayer' meme is basically as absurd. Yoichi wants to rip the SOA a new chapter and invade Venezuela ... blind to serialized history already easily proven to be the cause, certainly not the solution to ... the present thorn in his eye .. which btw, ian masters [duh hi holy leftard] had on his program today as well. i'd prefer a switch from spraying bullets to droplets for that matter. i will just reiterate that the whole thing may completely go over most of western heads but amounts to a sino act of subtle agression on the indian continent, an extension of their stance visavi Tibet. Addy speaks to Bexte of countersignal in the last section of the vid. The latter was still at Rebel Media when publishing a cover up regarding Canadian athlete mow down weeks ahead of the official outbreak, altho curfew was in full effect already [perhaps to target the international guest while keeping locals out of th way - if spray tactics a la GW 'dirtymindreaderness' 'holds water'?].

It's been circulating widely via social and traditional media over the past few months and, according to VICE, is particularly popular in China. In fact, some have speculated that the narrative is being fuelled by Chinese authorities in an effort to deflect scrutiny over the pandemic elsewhere.

i'm starting over: .... similarly, George's "get the ball rolling" .. [just one?] is disrespectfully 'diversive' to the peacemaking potential of truely truely clean and abundant energy once balls of clay roll on wooden tracks from hub to rim and back of a wooden wheel in a tree culture world that needs articullation and envisionary, artistic rendering enough to kick off the 100th biped effect. you cannot stop, subvert, sue, outlaw, or invade and break the bad guy strongholds [and strong hold on the bribable classes ... yes lying is a profession, whoremouthery, .. and it's practitioners have cordoned off the still sane parts of the law].
What you CAN and BETTER do however, is g[r]o[w] around them and dessicate them .. simply by generating power cleanly and cheaply ... assuming that done, the prob becomes policing ethical use, We need enforceable laws that stipulate application cannot be any less clean, cheap and wholesome [once evil ambitions are nipped in the bud and cured], perfect infoflow is a strict requirement at that point, which means all access radi[c]ally and passive transparanting registration centrally. my intuition tells me your team's ferreting is all true, ding ding ring and the lot .. but ... you're looking for [du real, grounded] growth potential not at all and for a simulacrum# in all the wrong places. Quickest possible catch on / take up of true 'slowth'growth rate takes appealing to and promotion of liddul ones .. across the board, at all levels, tiers and 'transspeciation' ..
= and a most primitive kneejerk one at that, the type that characterizes the 99% of male parenting which does not manage to rise above playacting out devouring monster memes. Perhaps your targets are victims of exactly that.

the neoprog Covid indulgence 'traid' is like Twitter. The earlier pharmafiyose tentacles however, the parallel to the bulk of e-waste, covers scape and farm with biocidals ever since they defeated Julius Hensel in 1870s court. Hope that puts it in perspective.

Most people donâ€™t know Fauci has military bosses for Fast attack drug approvals.
Is the Fauci Fast Track the same as Michael Callahan and Robert Maloneâ€™s DTRA DARPA Fast Track for Remdesivir? I say no, and thatâ€™s maybe why they are hanging Fauci out to dry.
My interest is following DARPA and the Michael Callahans and Dr Robert Maloneâ€™s in the development of aerosolizing anthrax with CoronaVirus antigen of SARS, MERS, SAR2, and HIV. @dr_cottrell
did the critical linkage to the Baric Lab and Zhengli for the Corona spikes since 2001.

Remdesivir ADDS to hospital time with no improvement in survival rate.

Dec 10
Ralph Baric and the Gilead folks knew a Remdesivir trial would fail after the failed Ebola trial in 2018. So they had it trialed in Wuhan by Baricâ€™s partner, the Wuhan Institute of Virology. We believe the Wuhan Military Games athletes provided the cohort for the drug trial.

It bears repeating that a breakout at the Wuhan Military Games was the only way Remdesivir could be approved after the 2017 Ebola fail. Trump only had one day of US patient data to go on for the Remdesiver EUA decision. Trump had to accept Baricâ€™s WIV and Chinese CDC data.

Was the massive air filtration system overhaul at Wuhan Institute of Virology on or before September 19th, 2019 a big throw? Iâ€™m learning tainted blood is 50x more infective than airborne pathogens. Vaping would be a far more direct route to the blood.

Want to know who is involved in CoronaVirus development? Get to know DARPA programs PREDICT, ADEPT, and P3.

Dec 9
Under DARPA skies here in Virginia. DARPA has vaccine programs PREDICT, ADEPT, and P3 to go along with USAIDâ€™s participation in PREDICT with vaccine proposals going to WHOâ€™s Virginia Benassi at benassiv@who.int.

@RealGeorgeWebb1: Fauci faked the shorter hospital stays for Remdesivir. Turns out patients had to return to the hospital for longer stays. Fauci hid the China Disaster Remdesivir studies from Trump to get the FDA Emergency Use Authorization (EUA).

Abdul H. Muhammad - @KRLUV9: Trump knew. He's no dummy. He's just acting using the world wrestling federation playbook. His uncle, John 5G Trump was the guy who reviewed all of Tesla's papers after his death. John 5G Trump said there was nothing valuable in all of those trunks of papers. FBI gave him it all.

Midnight Riders - @ProtestChris: Trump signed EO13887 in Sep 2019. I think Trump was comped a lot earlier than we thought . Gates met with Trump twice and reported that Trump was a moron about Waceens and kept asking about Gate's 16 yr old daughter, Trump was advised about Dr V Zalenkos 99% effective #Zelenkoprotocol by Zelenko himself who has

the records , and Trump still authorized Emergency Use.

Georg Webb on the ‘Jaws of Nato’ ……. Revolutions

Azerbaijani and Armenian separatists had been cultivated for decades, and the new NATO plan called for a fusion of a land corridor between the Volga and Donbas region of Ukraine, perhaps as far north as Volgograd. But first, there was the sticky problem of the bio ethnic cleansing of the Ukrainian Donbas to test if this new "biowar" was a success strategy. Whiteboards and photo boards of Kolomoisky were carefully prepared for our March 2020 news summit, preparing the citizen journalist to get to the bottom of what Kolomoisky was doing in the Donbas and in China

Our research group in March 2020 who met in person for eighteen days at a retreat house on the Potomac River near Washington, D.C., was immediately immediately diverted by a White House reporter bringing us a fantastic story that the Chinese Foreign Ministry was accusing the American "delegation" sent to the Wuhan Military Games in October of 2019 of bringing the CoronaVirus to Wuhan. Given our previous research, I thought Kolomoisky was a far more likely candidate to spread a new, novel pandemic virus for the "Washington NATO Plan" than a US State Department delegation imbedded into the US athletes. ---------- Still, we ran down the leads to the Chinese allegation and found indeed, there were in fact US State Department Diplomatic Security Services personnel working for the high test levels of NATO embedded on the American team. We did find a Canadian NATO BSL-4 Biolab sending pathogens to Wuhan in 2017, 2017, 2018, and 2019. We even animated these frequent pathogen trips a la Raiders of the Lost Ark style map graphics and accompanying music. And we found three very high level officials, all with the surname Benassi, involved in all aspects of procurement and vaccine selection for the new, novel CoronaVirus. ---------- Now, more than two years later, I am about to go into Italy where the Benassi cabal is based. One Benassi, Pietro Benassi, in head of Italian Intelligence and has overseen diplomatic covert actions in Libya, Syrian, Ukraine, and South and Central America. Another Benassi, Giuseppe Benassi, was in charge of all NATO procurement in Europe, and he ran the NaTO spy school in Oberammergau, Germany. A third Benassi, Virginia Benassi, managed not only to get all the vaccine bids for CoronaVirus, but for Ebola and Zika virus emergency bids as well. A fourth and fifth Benassi have worked on disabling the immune system with nanoparticles while a sixth has developed a CoronaVirus "sniffer" for national security purposes.

So here I go into Italy now to dive into the story more. I have been warned I will be arrested for the slightest infraction in social media for a period of incarceration of up to six months. But we have to get to the bottom of this cabal. Hopefully, I will continue to enjoy help from people who are in the know, and know there are great wrongs being committed. Well, here we are at the border. I will see you all on the other side.

In the next installment here on Substack, we will talk about the "Washington NATO Plan" of 2009 which Citizen Journalist George Webb believes was the covert program for testing Ft. Detrick bioweapons in Arab Spring after testing them in Western China.

this periodical literally shaped my life ...

[this passage comes after the King Arthur in Nigeria legend, a 'magic' bean story]:

> The Israeli research turned out to be blockbuster stuff, not only because it identified the cause of metabolic mischief, but also because it clears up the chain of events that has led to debauchery of food and farming, the annihilation of the health profile, and the probable incubation of the modern black death about to overtake planet Earth. The poisons that guide high science are tabun, soma, sarin and eserine, which were first isolated from the Calabar bean in the early 1840s. The parent materials mentioned above retained their botanical properties until scientists learned how to synthesize everything from medicines to agricultural poisons. Synthesis may have unlocked a few of natureâ€™s secrets, but not all. Nevertheless, the laboratory game was off and running, leaving dying and crippled soldiers to harvest the whirlwind. One at a time the group of poisons rose like a miasma from that barrel of hydrocarbons, the so-called substitute for biodegradable botanicals. One class came to include paraoxon, also known as mitasol, also employed as an active metabolic (active ingredient) of parathion. The next class includes parathion, EPM (a widely employed agricultural insecticide) and malathion. This class was perceived to be safer because of rapid metabolism by higher organisms.

16th minute our Palestine liberation opPoser says this about his IDF kids visavi kanye, should he go "anywhere near israeli territory": "drop him like a bag of dirt" . then: "watch your mouth around tel aviv" ... that's a sliding scale close to free fall ... but before making a threatening hand gesture and repeating the dirtbag treatment, throwing "punk you are" in this time, he adds that Kolomoiski is off-limits for breaking it. Bizarro

i think some signs here and there, albeit faint and faded ... [my specialty, see my fundamentally groundbreaking work on cernunnos visavi Samudra Manthan], point to jews callin in an asian warlord or coachteam to deal with the romans ... the first hard to disown hybrid wave of their 'vary' own, khazaria was a second, which in turn 'burst' the bolshies, then nazis and thereafter neopayper clipcons with so many cross stitching the mesh has matted to resist and defy any and all reform. ANTHRAX in Holland
re the dutch pioneering the bioweapon field ... an early memory of mine is being with my father dealing with anthrax cases and the off-limitness of the burial grounds [good luck with that on peatsoils below sea level].

i do not recall what they named it .. but i can tell you he was a billiard player, motorcycle man and pugilist ... he dodged marriage troubles for months and months at the time. Mom never gave up and even went to a casino with him and me, about 5, in tow. We didn't go in and when in front of a cathedral later i thought the same would apply there. Diffrunt vibe but kinda offworld[l]y too ...

i've only lately gotten clarity as to why dad began checking the quality of frozen meat arriving in Rotterdam from Argentinia by ship, sparked by a few years older man who admired him and is retired from being a naval electrician which took him to arab countries and eventually china .. with a gal he rescued in some arab bar or something ... she speaks a few words of dutch and the snackbar --- once ran by the man who worked for and saved with my father to afford it [i used to run up and down sometimes lengthy drives to deliver a few ounces of sliced breadmeat wrapped in factory fresh plastics ... the reason i am neither man nor woman really ... from the little Morris van he was driving for that purpose] --- is now chinese owned and operated.

Sorry .... got distracted from dad's duck and go for a few paras ....

I am now happy to perceive it as an ethical move .. but instead of an encircle || zoom in || secure || extirpate progression, it became a set of separate and for the most part, cause unpolarized [..... that takes .. 3 ... {{the break{{{ers}}} thru binareeee!!!}}, the wit and sweat of our George Webbsies in but not of this world], 'tolerant routines with all the sooner or later epidemiological consequences 'vandien'.

'Sit u way shuns' kinda froze [due to success so wild the state came to take it's cut RETROACTIVELY as if my father was the one perping the pharmafiyose crimes he was merely working around to show disapproval - his bloodline took 700 years to move 40 miles .. go figure].
So the growth hormone side of pharmafiyosity persisted. He found ichemAG dope as distasteful, debased, harmful and denaturalizing as it was but his 'free' trade dodge not only proved no recuillier pour mieux sauter but caused a meanwhile grown massive prob: bottomline falsifying footprint unaccounted for ..... iow, it became a FASCION, a neolib scion, zio after a fashion ..... and the 'transportation nation' memes were born, lifted hitching rides in my fathers raging cartpully bullish wayzwake [fastest man in Rotterdam behind the wheel {{the other guys used americans but not hotrods}}, never no accidents ... like i was on pedals in Amsterdam 35 years later on abandoned and liberated brigs i used second hand spokes to keep fit .. a big messenger race was organized in order to tempt me into proving myself but limelit phoniness of dutch mediatics were already turning me off big time, that part at least].

> Ten Questions For Bob Malone About 9/11 ---------- Simple Questions To Get To The Truth About Windber Research Institute, Flight 93, The Shanksville Crash Site, And 9/11 Anthrax Attacks ---------- Recently, it has come to light that Robert Malone's boss, Nick Jacobs, at the Windber Research Institute, was meeting with a former Mossad agent and a US Special Forces Army Ranger about anthrax screening at the Windber Lab that morning of 9/11 before Flight 93 took off. Flight 93 crashed 16 miles from the Windber Lab, and Windber Medical paramedics were dispatched to the site and spent all day combing the site for any signs of survivors and evidence. Robert Malone testified in an affidavit filed in November 11th, 2021 filing in the Middle District of Florida lawsuit that he was employed at that lab during 9/11.

this is not the same length as what i have .... it's a small diff .... but adds to the true searcher's confusions and headaches of course .....

I also prepared an illustrated ten-minute summary on Rumble which you can find here.
https://rumble.com/v2x02ie-part-1-upmc-coronathrax-to-cancerthrax.html

CIA's low-intensity cancer warfare strategy, and I believe the UPMC is at the heart of it. The CIA's low-intensity warfare story at UPMC starts after the 9/11 anthrax attacks in 2002. Aaron Adler and I covered this story in 2021 when I was working at the citizen journalism school in Michigan.
The big idea is that the CIA, using Mossad intelligence officers as a proxy, created a Continuity of Government declaration on 9/11 with an anthrax scare (the Flight 93 crash site is very close to the CIA's Windber Cancer Lab), in order to fund two decades of development of bioagents to conduct low-intensity warfare.

"Anthrax Secret Team" in a substack entitled,
“Robert Malone Confirms Reporting On Sina Bavari, Ft. Detrick, DOMANE, And Darrell Ricke".
I am at the limit for emailing this substack post, but please return to this developing story. I will be illustrating the CIA's intentions and actions to conduct cancer knockout experiments on those "deplorables" it perceives as "MAGA terrorists" and disinformation journalists.
When you return, you will see the cancers the CIA is targetting including breast cancer, prostate cancer, blood cancers, and also chronic inflammation conditions caused by viruses using SV40 promoters that have a long CIA history of causing cancer.

Snake Venom? Yeah... Kevin McKernan at the Human Genomics project is intricately familiar with the legacies & current wholesale direction of Nazines & other treatments towards Venom. There are countless candidates rolling out for it. Why? Because it's all been venom based technology since 1891.

went back to pin my response but failed to copy paste it here .. around 10am, after a 4to6 early sesh .. it mentions Hensel being born in the year of the snake

And WHY has it been venom based technology?
Because the entire program is about Genocide. Culling. Targeted assassination. Reduction of 'undesirables' .. Race based targeting. This isn't something "new" that Kennedy is pointing out. It's the entire program, all the way back to 1891 HEK293 cells. Human Embryonic Kidney. From a Black Female. immensely tragic .. us humans can't get our head around puttering w crystals any more sensibly ..... an exception i had the sheer luck to get to know is pim conradi .. he fashioned stacks of parallelograms out of remainder coathangerpiles and popped, nailed / wired and screwed them together into rounder and rounder shapes the bigger they got ['ik wil bolletje' was his motto, cribbed from a biscuit brand commercial. He got some facetime inspiration from 'Bucky' back in the day].
Pim was always lugging bikeloads of waste wood and metal to his den to pick apart and piece together ..... RIP Pim ... and forgive me for not turning your place into a 'permieuseum' somehow after you left for England and bequathed it all to me ..... i never touched any of it .. and the squatted ex airtraffic tower building it was all planted in sorta assimilated it quick enuff .....

that same day i rebutted 'aplanetruth 4u':
'sathanatopians' have turned the breach of infection and the antibody of immunity around - the pharmaffiose 140 year long and slow but victorious and presently cllimactic march thru the institutions have stuck to tried and 'true' [but alas, evil] needleage .. inverting and reversing cause and effect.
Profiting by 'cures' and 'preventions' (which are nothing of the sort and worse than short cuts or emergency measures, nothing like proper living at all but rather quick fixes that sanction, condone and promise ability to perpetuate bad habits with impunity).
The infection thing is real but it applies and takes hold of those below certain thresholds, incredibly sharp and often invisible, more and more 'merely' vibratory frontlines of tec and memetec where timely warnings (ignored, such as my 13000 pages of notes and hints since 1996) stop without starting much at all in the first place and nasty suprises begin with the speed and range of weather systems

Replying to a long comment by DaBluntTruth there:
yeah good info .. except that viri do exist and can cause epidemics in any and every region compromised in some way or other, then travel on weather systems to the next, but the dilution and homeopathicization of that transport gives surrounding regions a chance to leaf thru their micro / cellular libraries and build a lock to capture and pacify the key gone so haywire it's become a drill with a mad spin.
This info passes at the speed of gossip, which is notorious for its height no? Thus very few epidemics turn into pandemics and a predatory pounce becomes a news item and matter of record.

Divagation: Disruption -- Red Kahina ---- Sep 15 ----- The 'germ theory' of disease in the mass media, as it becomes, at once, more and more crude and more and more magical, is one effect of this thoroughgoing fragmentation of humanity-world. Ironically, pseudo-dissident defenders of this backward, mechanistic biology (e.g. Robin Monotti, Giorgio Agamben) also tend to be advocates of a mystifying, flabby pseudo-holism, wherein distinction itself is dismissed as Mara and the ruse of Satan.

This successful fragmentation, which we should picture as the obstruction (and pathologizing) of synthesizing capacities â€”the logging on to a prosthetic mind equipped with a paradigm of reality modelled on the â€˜dial' as it was once called, of television channels â€” allows for the highly uncivil insistence on obedience to the worldview and biological models favored by the pharmaceutical industry to be carried out by ideologues who in general discredit the very intellectual tools they ostentatiously and hamhandedly deploy in defence of the ruling class messages. Carrying out their brief to defend the plague show, they're prancing around before their power points of comically manipulated garbage data and cartoon imagery of imagined virii, and on the other vending a mildewed anti-intellectualism from the early 20th century, those fascist pseudo-critiques of analytic anything-whatever, that is, Heideggerian woo-woo honte-ology ----- -- .... snip ..... In the days when X files was this huge worldwide it, nobody thought to view it as excitingly reversing a gender binary by portraying Mulder the Intuitive Holistic Mind and Scully the Skeptical Detailed Analytic Experimenter. A lot of fascist ground has been recovered by ruling class' revanchist culture war with their many fronts and flags (both the pronoun-cers and the anti-pronouncers are vending humanity as a stuff that comes in pink or blue). ----- But these signals can all be juggled now. Endless scissor rock paper rounds. The bad White Science, the authoritative White Science, the toxic masculinity, the virile virology, the wicker mass, the wicked consumer, the funder crowd, etc etc. ----- 1-- Derrida played with ontology as hauntology, hantologie, the knowledge of the spectral, of ghostly traces, and I want to add here honte, shame, shameology, to stress the spread of the malady of Nazi somatophobia and life-loathing which Klaus Theweleit has recorded and examined so thoroughly in Male Fantasies.

https://powdertowell.blogspot.com/2023/10/hibrow-wefwhobro-delta-intrugue.html

----- George Webb - Investigative Journalist (Official Osprey Fanpage) ----- George' Webb Task Force Orange Journal ----- I have written four books on the Erasmus Lab and I went there last year to interview whistleblowers for a week and work with Andere Krant in Amsterdam. Here is a summary. ----- https://georgewebb.substack.com/p/erasmus-blood-on-the-floor-connects

Erasmus Blood On The Floor Connects All The Deep State Mates ----- When I wrote the book, "Deep State Mate" about Henry Kissinger's tutelage of World Exonomic Forum, Director Klaus Schwab, it was about putting class Schwab into the Generalship of low intensity warfare against any resistance to world government. ----- Schwab was to be used as the hammer to "Whack-A-Mole" any resistance to the European Union, NATO, or a world government agenda. I expand it on these ideas in a further book about how specifically the Virus Vaccine game was to be used by Klaus Schwab, to achieve the objecting, and affect using viruses and vaccines as a form of low intensity warfare. ----- ---------- ----- A great deal of additional research and investigation brought me to the main spearhead of this virus vaccine game in Europe - Erasmus lab in Rotterdam Holland, a program, primarily financed by Royal Dutch Shell, and indirectly by the Royal Dutch family itself. This research led to yet another book called "Royal Dutch Virus". ----- And finally, I wrote a book about the Erasmus lab itself called ----- "Spray It In Dutch", a lab I have been following since the fall of 2019 in a suspected release of the influenza virus in a great reset type of live exercise, complete with the Erasmus Lab's illegal gain of function work and the unbelievably irresponsible resurrection of the 1918 deadly Spanish flu. ----- This set of four bookLETs was finally capped off by my tour through Europe in the spring and summer of 2022 when I could finally travel again, when Covid restrictions are lifted. ----- So when the recent Erasmus lab murders inright after and during the visit of Klaus Schwab to meet with the Dutch Prime Minister Mark Rutte, I was immediately suspicious. But when I heard the Dutch Health Minister, Ernst Kuipers, had also signed Klaus Schwab's WEF, Global Health Pact during the Erasmus shooting, I began to investigate. Kuipers signed away a great deal of Dutch health sovereignty with us Schwabâ€˜s WEF, Global Health Pact, and the timing of the shooting was just too coincidental for me. ----- Still more incredibly, Klaus Schwab had used the Erasmus Lab the Boston Consulting Group Remdesivir and mRNA vaccines in the United States. In Schwab's book, "The Fourth Industrial Revolution", Schwab had tried to sell Smart Hospitals with AI doctors and nurses. ----- The CEO of Boston Consulting Group Christoph Schweizer, was prominently featured at the WEF meeting at the outbreak of coronavirus in Davos 2020, pitching Schwabs Smart Hospitals. ----- BCG's Schweizer pitched Schwab's previous books about the fourth industrial revolution and his coming book, "The Great Reset". ----- The Boston consulting group would go on to feature Erasmus lab as the model AI hospital in their book the "Patient Priority". ----- Josh Kellar of BCG would devate a whole chapter to the Erasmus Lab as a model of the new Smart Hospital system. Later, Kellar would write the whitepaper with Jordon Walker of James O'Keefe fame, that gave us Remdesivir as the Standard of care and DARPA mRNA vaccine. ----- Jordan Walker seem to be hired as a consultant to distance call Schwab, the WEF, from instituting Remdesivir and DARPA mRNA vaccines as the standard of care in hospitals around the world. ----- Jordan Walker's boss, Shuang Sarah Wu, also a consultant for McKenzie, also wrote two white papers, Lightspeed 1 and Lightspeed 2, inculcating DARPA mRNA, not only into all of Pfizer's vaccine products, but also the cancer therapeutic areas the traditional cash cow of Pfizer. ----- Shuang Sarah Wu's employment as a DARPA AI scientist with her patents in 2013 for weak voice AI and her patents for air conditioning systems for US hospital systems in 2018 seem to indicate that she was being re-purposed conveniently to hide the true source of the DARPA mRNA vaccines. ----- Erasmus Blood On The Floor Connects All The Deep State Mates ----- Erasmus Killer Connects Kissinger, Royal Dutch Family, Klaus Schwab, And The Erasmus Lab ----- ---------- ----- I saw all the effort in direct action by Dutch farmers during the summer of 2023 and the previous summer, all evaporating in one mass formation psychosis school shooting scenario. ----- The entire mosaic appeared to be a cast of characters brought together to create a false narrative of a situation, using mass formation, psychosis and panic to create knee-jerk acceptance of forgone conclusions. I created a term in 2017 to describe the situation of mass formation psychosis with a knee-jerk acceptance of preformed decisions called "a school play".

:::capitalized words by Piet: ----- I hope this gives people some idea of my skepticism of the unbelievable circumstances of the Erasmus Lab shooting in the S::H::O::C::K::I::N::G number of intrusions, not to say ATTACKS on Dutch and European health sovereignty --

[Piet: mitigated by the pitiful remainder actually left of that diabolically worshipped {turned intoa voodoolike, handpuppeted and pHARMafiyalogically reprehensentienced} spectre of it's waived self -- that occurred at the same time].

p122: short intro
p123 +2p:
Spare a thought about Indigenes - Part of a digest about a sojourn in Gondwana land (oct 96-aug 97) also called New Holland for a spell before a new one was cast: the utterly dissociative term: Terra Nullius, nevertheless crown land, and yet prime location one can send incorrigbles down to, since it used to be so conveniently remote not realizing that conflagrations on one side can call forth precipitations collateral on the other as 1998 seems to prove beyond a doubt but one must have an eye for the obvious; Hamaker's differential effect (colder here means warmer there budging the average very little) and this year particularly incriminating for Holland since Indonesians caught the neoliberal 'big fish swallow lil' ones' bug from us good.

Now these parts are known as Ozzie land after the land of Oz which seemed comparably miraculous; perhaps not such a coincidence either. Indeed appropriate enough since, by the way, http://www.dickshovel.com/roeschbaum.html = offers bits of 'evidence' about Frank L Baum's supposedly genocidal agitation .. despite his supersound money sensibilities.

VERSION 1 [as posted]:

i was in america at the time and still schizoflippin to settler memery [4] myself but a trip to Oz cured me permanently ... i live in the dutch village of my birth and i, along with all other desdendants of the Spinoza wave/swarm, have enuff 'te stellen' [=bother] with the element of 'ueber fremdung' i was born with and thus cannot help but bear out [my dad is from a line of 50 miles w of migration in 700 years and his nazi sympathies were kept in check 'selfrestraintwise' by wisely marryin the eldest of 5 fatherless farm kids ...]

My otherness has resulted in awaking a nearly deadly hatred in peeps who jumped only s sub three figure amount of miles to follow their daughter to a fulltime care institution [i myself grew up with a down sis who got gainful employment in a slightly adampted factory].

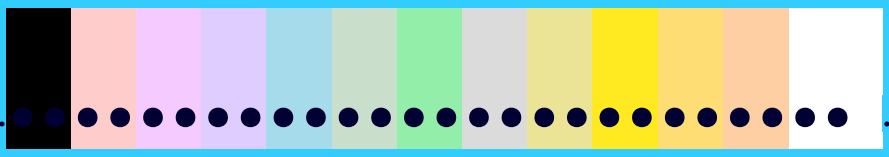
They saw fit to poison me with 'off the shelf' round up [a dandelion, my doorstep herbal] with the perfect excuse they were just helping me weed .. an inversion of their actual complaint about my greenery missionarIZum tainting their sterile prefs - i got the height of summer temps indoors down 20 degrees celsius with that green and tho recommended on the radio nature program aired during sermon time on sunday i got all kinds of grief.

They got jealous Re sound happy children make on top of the manicure prob which added up to make them 'giftig' [dutch 'anger' = poisonous, literally]. Resorting to actual poison became a very small step and so they turned my life inside a second time.
The first time i got child abuse specialists interviewing everybody and i was adviced to not let any kids in any more ... not 1, 2, 3, 4 or more anymore .. none ... and still half the village began to label all relevant agism horrors they heard, read or saw from and via any source but me [some silences are damn near deadly] with my name and turned me into a canvas to project their selfinflamed imagery upon, impressed it all on pre-teens [the age of kids associating with me had steadily declined one year per year; testimony to eagerness, not my direct doing ... but who here sifts for fineries? the proverbial and long since chimericalized 'kniesoor'? .. prolly more susceptible to chemical degradation than ordinary mortals, huh? Sigh].

Where was i .. yeah, ... the looks i get since then ... half the kids now think i am a monster .... covid happened to kick in at the time and everything went dead dead dead and the streetlife still hasn't revived. i plunged into a sea of psychodenial and despite ever more excruciating symptoms did not actively choose the path to recovery for months and months.

i am dealing with a very hi rank black witch, living next to me w her genetically damaged brute, sire to an lifelong instituzionee, with impunitee as we speak [daughter corps of Dupont endangering one of the most wonderful deltas of europe since the 50, shortly after their US atrocities ... She's hi rank alrite .. just as hi as my mom was on the good side - despite her susceptibility to / weakness for doctor and preacher].

VERSION 2 [left in the ‘sgc 11—sans cov’ file as I pull these strands apart for a re-up .. I never learn do I? Good notes on THAT the last few days btw – march 18 and 19 2025 .. iz days into the genocide restarted]



.... invisspannie [same as bg] .....2024 begins page 12..... ... . 'the' virus is a bluff caller, the redditeers are too

down to end nov ... a few 'zieiks' to be taken out as of yet ... end of march 2025

For an audio introduction on how Robert F Kennedy was hot on the trail of Oswald and his connections to bring in Nazis into New Orleans in the early 1962, here is a Twitter space that I did on the topic. Robert F Kennedy was closely associated with Charles W Lyons, a hand-picked Boston Catholic from the FBI. McDuff fits that exact same description being brought into the Kennedy White House at the same time in 1962.

> GW: Key evidence I had uncovered included Blackberrys used by the Senate to negotiate the Iran nuclear deal, which had also been used previously to orchestrate the Arab Spring a host of other covert weapons deals. This key evidence, instead of being presented in the best possible light to Congressional investigators and the DC Court, was pixelated and undermined in credibility to a filmmaker who I helped get started in social media. Because the filmmaker was pixelating the key smoking gun, the Senate Blackberry, the whole class action was tainted, and in the daily, petty diatribes from the filmmaker demanding more money and attention didn't help either.
> The responsibility I felt to every American and especially veterans who had fought in the Soviet era as a bulwark against Communism was slipping through my fingers.
> I just spent three day with a Marine Colonel who spent thirty years directly advising the Joint Chiefs of Staff on new methodologies of land, sea, and air warfare. His father was also a Marine Colonel who served in combat in three different wars. I didn't have the heart to tell him the DNC was brokering the hard won spoils of war from the five decade conflict with the Soviets to the oil, rich nations of the Middle East, including nuclear fissile material and bioagents.
> Now the filmmaker has come clean, finally publishing the key witness in the Senate's picture after six years of withholding it from me Finally the Blackberry is unpixelated as well after six years of undermining.
> Small consolation for the dead at Arlington who fought an died so those nukes and bios wouldn't be sold to fund Washington corruption and a Deep State chokehold on power.
> The battle would continue though a few months later with a female, ex-cop from California who was working with

veterans who are on the brink of suicide, who had given her critical information to help my investigation.

It had been a whirlwind eight months in Washington including numerous trips to all the spy rings safe houses around the US and Canada. I visited illegal entry ports and safe houses in Canada to weapons caching locations in Indianapolis and everywhere in between. And along the way, we focused on the brokered Soviet military bioagents that could one day be turned on the American people

Our researchers have been proven right time and time again on the Senate and Biden Blackberrys, and we were right about the bioagents as well. We can't change the small minded pettiness of the egomaniacal and the shortsighted. We press on every day with new investigations, knowing the inevitable validation and substantiate our research.
But man did we miss a golden opportunity in the Fall of 2017, and every year since.

... pretty amazing stuff on the last one ...

> Did three different DARPA Spy Girls go after Bruce Ivins Anthrax notebooks? Remember our visit to Cornell - the recipient of NIH and DARPA Anthrax grants.
> Bruce Ivins giving a soccer ball to DARPA's Amy Jenkins has been characterized as a sexual gift. How is that sexual? Ivins might have been wishing Jenkins well, now that she left Ft. Detrick for her Anthrax Fellowship.
>
> As I stated in the Summer of 2021, the DARPA spy girls were luring Ivins to Ivy League campuses to extract his Anthrax expertise from Ivins' notebooks. The DARPA girls possibly have used a KKR encryption scheme frequently used by none other than Henry Kissinger for encrypting his Anthrax notebooks. I don't believe Ivins would be putting his Anthrax notes in a KKR sorority code. I rejected Ivins's use of a Kappa Kappa Gamma sorority code. The Greek letter Gamma looks like a lowercase r. How could all the DARPA spy girls ask Bruce Ivins to encrypt their communications in the Anthrax notebooks he gave them from different college campuses and not be part of the same exfiltration team?
> I believe Bruce Ivins used a simple Caeser cipher wheel with the KKR DARPA girls. I don't even believe they rotated the key off a seven-letter frame shift.

>
> "Bitten: The Secret History of Lyme Disease and Biological Weapons".
>
> About My Guest: Kris Newby is an award-winning science writer at Stanford University and the senior producer of the Lyme disease documentary, Under Our Skin, which premiered at the Tribeca Film Festival and was a 2010 Oscar semifinalist. She has two degrees in engineering, a Bachelor's degree from the University of Utah and a Master's degree from Stanford University. Previously, she was a technology writer for Apple and other Silicon Valley companies. She lives in Palo Alto, CA.
>
> Key Takeaways: - How did it feel to be a senior producer on "Under Our Skin"?
> - What did Willy Burgdorfer share in the early interviews for the film?
> - How did Willy discover the spirochete that other scientists had missed?
> - What were the goals of the biological weapons program?
> - Is Lyme disease the result of the bioweapons program or a natural occurrence?
> - What organisms were part of the cocktail that Willy was experimenting with?
> - What is the "Swiss Agent" and the role it may play in the Lyme disease epidemic?
> - What is the "Anthrax Hotel" and the "Eight Ball"? What happened to those that were part of the experiments at the "Eight Ball"?
> - What role do viruses and parasites play in Lyme disease?
> - Was Willy a good guy or a bad guy?
> - Did Willy's own death from Parkinson's disease potentially result from his own experiments?

> "Voices from DARPA" Podcast ---------- In this episode of the Voices from DARPA podcast, Renee Wegrzyn, a program manager since 2016 in the Agency's Biological Technologies Office (BTO), recounts the origins of her current interests in synthetic biology and genomics, both of them powerful frameworks for engineering biological systems for technological ends. Still wielding influence are her childhood days amidst Florida's abundant wildlife, a science-hooked sister, and a high school field trip in which Renee encountered fossil mastodon teeth. Her subsequent experience in the biotechnology industry got her hooked on the versatile power of combining biology and engineering in ways that can produce new medical technologies, materials, and other products. Along the way, Wegrzyn recounts what for her was a "Sputnik moment" in biology, based on the emergence of the celebrity gene-editing toolset known for short as CRISPR, which has underwritten an immensely powerful genetic and genomic engineering framework. Under Renee's DARPA programs, Living Foundries and Safe Genes, researchers are innovating new means of manipulating and leveraging biology's ways of eliciting traits in organisms and of making molecules and materials while also developing means for keeping those same bioengineering capabilities in check to hedge against their misuse or unintended consequences.

HCQ was condemned based on idiotic experiment ... and a strong, brief burst of taking strong measures with something harmful in any longer run is often still the wiser choice over choosing too low a dose of something friendly for years to suppress and contain a problem.

> WhiteEagle1927 - 2 days ago: I've been a follower of George Webb for YEARS...long before Trump got in office. His journalism was awesome. He uncovered LOTS of CIA, Obama, Hillary's evil deeds. His vids on YT was well over a hundred and truly eyepopping and mind-numbing, with info that no one else had...like the mass grave found in Syria, during Obama's time, that contained about 700 bodies of children...all with their organs removed. Maybe this was the real reason the White Helmets were there? Organ removal instead of saving lives? YT took down all of Webb's posts. He was naming names.
>
> I've often wondered how he could still be alive and that's the one thing that gives me pause. George admits to being a Jew (his real name is George Sweigert) and loves the state of Israel...his own admission. Once he lost his YT channel, he bounced around a lot. Every new channel he created, on other platforms, were quickly taken down. I still follow George and his latest info on Substack, about Flynn, was upsetting to me (he also disses "Q"). The thought of that POS being

President makes me sick. However, it's been brought to my attention that Flynn isn't really Flynn. Much like Biden isn't really Biden. Waiting for this movie to play out... As for Ivan Raiklyn...very bad vibes from him and not surprised he's a close Flynn team member. ---------- On another note...BoomaSan...I suggest you watch this MrTruthBomb vid about Nick Alvear's GoodLion films. Alvear puts out some good stuff, i.e., his Pervy Hollywood films. However, I don't agree with some of his other films.

Int 785 with George Webb & Boyd Anderson ----- TheMissingLinkLive -- 8.51K followers --- Streaming now --- 949 --- George Webb is an author and citizen journalist who decided, after a long, successful career in technology, that something had to be done about mainstream media news misinformation. Webb left the world of high tech to self-finance six years of doing citizen journalist reporting. Webb also finances a series of news seminars, training seminars, and a helped finance a citizen journalism school in Michigan. Webb has been the frequent target of CNN and other MSM outlets like 60 Minutes, Reuters, Forbes, the Washington Post, and others. "I wear the smear pieces from CNN and 60 Minutes like a badge of honor" says Webb. "For them to devote some much prime time to attacks on me must mean I am doing something right". If you give a shit about the world and you like George's work, you can buy him a coffee here. https://www.buymeacoffee.com/georgwebb1

With one record-smashing night in his exploding hockey career, Boyd Anderson went from 'the best line in junior hockey' to an international playoff team of champions from Zug, Switzerland. After creating a huge sale to Saudi Arabia, Boyd moves from Toronto to Budapest to Dubai and unknowingly finds himself at the 'Top of the Food Chain'. It is in Dubai, 2007 where he meets Thomas who introduces him into a world of deception and unimaginable Power Weilding Elite, hyper-competitive deal-makers and hungry profiteers, who trade entire lives just as easily as they swapped arena tickets and team contracts, behind the scenes of business , governments and politicians you've heard of. But when CNN announced "Malaysian Airlines flight MH370 has disappeared" on a March morning in 2014, Boyd immediately blurted out, "I know who did this." Horrified, he became an investigator, using his highly toned instincts and perception, along with his memory. Backed up with facts, he saw all the pieces coming together, realizing that hundreds of lives lost were just 'collateral damage' for a 55,500 Ton gold heist. Even worse, using ancient numerology and researching the main players introduced to him from a nearly-forgotten contact who had described a plan for just how Bitcoin, political turmoil in Europe and the Middle East, and even the world's economy would play out -- drastically changing the world as we know it, in just a few years. After spending 3 years investigating and researching, Boyd discovered 3 abandoned Boeing Jumbo 747's left on the tarmac at Kuala Lumpur airport, he finally figured things out. Unable to escape the feeling that all the signs were in place for a scandal that's bigger than Watergate, now everyone needs to know the truth regarding the origin of Bitcoin, Ethereum, Monero & ETC Classic, the Blockchain, Kraken, Brexit, ISIS, Interest Rate Hikes -- and the biggest gold heist-assassination in the history of the world!

> We also exposed four other CIA overthrows planned by David Petraeus and the Clinton Foundation that Eric Braverman was expected to conduct on behalf of Hillary Clinton before he balked at the job in 2015 and began leaking DNC emails in 2016 to protect his innocence.
> We didn't miss a trick regarding the DNC emails, Eric Braverman and John Podesta, in 2016. And we are not going to start now. Julian Assange has now pleaded guilty for no reason to conspiracy, and he has made his deal with the devil DNC, in my estimation, with that guilty plea.
>
> Now, the DNC emails have mysteriously disappeared from the Wikileaks website, and Hillary Clinton has announced her new book the same day
> In 2016, I reported that Podesta used Seth Rich to lure the first batch of sanitized DNC emails to try to entrap Trump into colluding with the Russians and Wikileaks. Podesta lured a second batch after the "death" of Seth Rich to try to entrap Trump a second time. I went to Washington, DC, in 2017 to find any evidence that Seth Rich had actually died.

Ep 53.2: US DTRA funding of biological research labs in Ukraine / Dilyana Gaytandzhieva interview

The reason why the US Embassy in Ukraine deleted the data is this article:
https://eu.usatoday.com/story/news/fa...
They may have deleted it but I have it published here, down in the article you will find all docs about 11 biolabs in Ukraine funded by DTRA. You can see who the donor is and I have taken these docs exactly from the US Embassy data that has now been deleted.
http://dilyana.bg/the-pentagon-bio-we...
Additionally, they have forgotten to delete these document from the US Federal contracts registry, you can find it attached in this link: rom the pdf file it becomes clear that the Pentagon has awarded a contract to a private company to rebuild and equip two biolabs in Kiev and Odessa, the end date is 2023. Another reason for the US Embassy to delete this data could be that the US is afraid what Russia could find in these 11 biolabs in Ukraine.

This is the video of the Russian father and kid in Donbass which Western media captioned as Ukrainian father and his kid: https://twitter.com/MoonofA/status/14...
This is a video where Ukrainian soldiers explain how they are shelling the Russians in Donbass in 2014 when the war started. You can see yourself what I meant by the total disinformation about Ukraine.

George Webb of Intrigue: Gaining perspective on George Webb, Dave Acton, and Crowdsource the Truth
CrimsonPillTV -- 745 subscribers -- 2,873 views Jun 18, 2017
Right now many YouTubers are wondering if their heads will explode -- the unfolding events of the past 10 days surrounding George Webb (Sweigert) and his brother Dave (Acton) Sweigert, along with Crowdsource the Truth's Jason Goodman, and an array of other YouTube channel hosts (Defango, HA Goodman, Lift the Veil, and many more) -- a situation that has seemingly devolved into open hostilities between many of them. ------ Any YouTubers who are in sincere pursuit of the truth about the real issues (DNC shenanigans & death of Seth Rich, corruption in the halls of power, â€˜pedogate,' many more) need to remain objective, be patient, and not get caught up in the intensity of the personal conflicts. ----- This is a time to use your discernment to take in the raw data and weigh it on its own merits - refrain from 'taking up sides' until we can sort out the valid information from the bogus.

Your host apologizes for the meager quality of the audio and visuals - sitting on the sidelines for several years has generated some 'rust.' Be well YouTube!

A Trip Down Memory Lane! Dave Acton Addresses Webb/Goodman Relationship Rumors and More
Larpworld Lawsuits ---- 56 subscribers ---- 452 views Premiered Jul 19, 2022 #GANGSTALKING #PSYOP #BLT
In Part I, we hear Dave (Sweigert) Acton discuss Youtuber Marcus Conte's accusation that George Webb and Jason Goodman were former lovers before they had their infamous split back in 2017, shortly after the Port Charleston "Dirty Bomb Hoax." Acton, Webb's brother, alleges that the rumors are, in fact, true regarding their relationship. He also goes on to explain the death of researcher Jenny Moore who died allegedly from an overdose. The Truther/Alt-Media community found her death very suspicious as it occurred in a hotel room right before she was supposedly going to interview an alleged rape victim of Bill Clinton. ---------- In Part II, Acton talks about the Marcus Conte/George Webb ongoing drama whilst enjoying his lunch. He notes that Conte intervened in the Webb/Goodman larpsuit by writing to a federal judge that Acton had committed criminal acts. Conte and fellow Youtuber Denise Matteau ("Tooth Fairy") at the time accused Acton of being in a criminal gangstalking operation.

GW on the 30th of july - cheney and nationwide stooge psyopera conductor snipes for "chips" [synthetic bulletproof glass patent holders dying behind Trump, shot from the very roof under which the tec was developed]

> @TheThe1776: President Trumpâ€™s attempted assassination was an INSIDE JOB! President Trump had long been determined a threat to the Deep State and the only way for the Deep State to survive is to STOP Donald Trump from ever entering the White House again! -------- George Webb excellent research shows us the incredible Cheney, Yearick, Cheyenne Tactical Weapon Connection. Not to mention bulletproof glass and plastics patents, all in one shootout. -------- The murder weapons chosen both by Yearick and Crooks for the Trump assassination was the Cheyenne Tactical Weapon, the CheyTac CT-15, made in Dick Cheneyâ€˜s home state of Wyoming. Roger Yearick developed the CheyTac sniper rifle, with .408 rounds four times more powerful than a normal AR-15 from Yearickâ€™s designs at Carderock Naval Surface Warfare Center. The Cheneys are family friends with the Yearicks from Wyoming. ---------- The predicate Cheney cited for suspending the BWC Convention was that Anthrax was found in the wreckage of Flight 93 near Windber, Pennsylvania. The investigator who concluded that Anthrax was Officer Tony Guy. ---------- Twenty-three years later, Sheriff Tony Guy would be the Butler County Sheriff who would look the other way from his Command Post overlooking the American Glass Building 6 while a twenty-year-old assassin would almost take the life of Donald Trump. --- the 'blue shirt vid -------- 5:25 PM Â· Jul 31, 2024 ----- 22.4K Views

George Webb of Intrigue: Gaining perspective on George Webb, Dave Acton, and Crowdsource the Truth
CrimsonPillTV --- 744 subscribers ------ 2,886 views Jun 18, 2017 ---- Right now many YouTubers are wondering if their heads will explode -- the unfolding events of the past 10 days surrounding George Webb (Sweigert) and his brother Dave (Acton) Sweigert, along with Crowdsource the Truth's Jason Goodman, and an array of other YouTube channel hosts (Defango, HA Goodman, Lift the Veil, and many more) -- a situation that has seemingly devolved into open hostilities between many of them.

Any YouTubers who are in sincere pursuit of the truth about the real issues (DNC shenanigans & death of Seth Rich, corruption in the halls of power, â€˜pedogate,' many more) need to remain objective, be patient, and not get caught up in the intensity of the personal conflicts. This is a time to use your discernment to take in the raw data and weigh it on its own merits - refrain from 'taking up sides' until we can sort out the valid information from the bogus.

Your host apologizes for the meager quality of the audio and visuals - sitting on the sidelines for several years has generated some 'rust.' Be well YouTube!

OK, you 'stopped lyin' ["no lawyer" in recent episode#] but still halfway off the truth .. until you dig into the Reiner Fuellmich case ... plucked from the west coast german consulate and subjected to postponements punctutated with 'solitary', etcetera. Like all brave and brazen truufers
i am just glad they did not hit him with cancer of the type that makes your last year hurry near and terminal .. like Sean David Morton's mouthiness netted him in feddie detention.
i am gonna scan your transcripts for 'german' and 'lawyer' but won't listen until you get up to speed on this bud.

----- Spike spike protein ------ Mark's rumble version of yesterday's longer one elicits a few words:
guan djou [egghead sino lass] respected by Plummer, THE "bad-ass" in the 'VirsVaxGAimeyefeye for Gain' maim ... she, along with garret covinger occupied a comfy zmap antibodies Boston perch until she was arrested, plucked away without a trace, perhaps told to go retrieve all the stuff she sent to china openly, perhaps also .. without a trace / remainder / original / copy.
.....
ebola and covid antidotes just might be similar ??? China had a lot less peeps die than expected .. after the initial sinowood scare [to get the feartec rollin to the frontlines stuffed and congested with the frightened throngs and altar volunteers Aztec style almost ... as crazy man james true observed at the time] of course.
